GLOBAL CONTENT SCALE

LoopNaria

Autonomous AI Content & MarTech SaaS for Global Scale

We build AI agents, not agencies. Automate your cross-border content workflow.

THE PROBLEM

The bottleneck in global content scaling

01

High human dependency

Traditional agencies are slow, expensive, and hard to scale across high-velocity campaigns.

02

Loss of cultural context

Machine translation misses local nuance and regional trends across North America and SE Asia.

03

Fragmented workflows

Shorts from VOD, dynamic UI rendering, and SEO blogs require 3 to 4 disconnected tools and manual syncing.

Made with GAMMA

THE PRODUCT

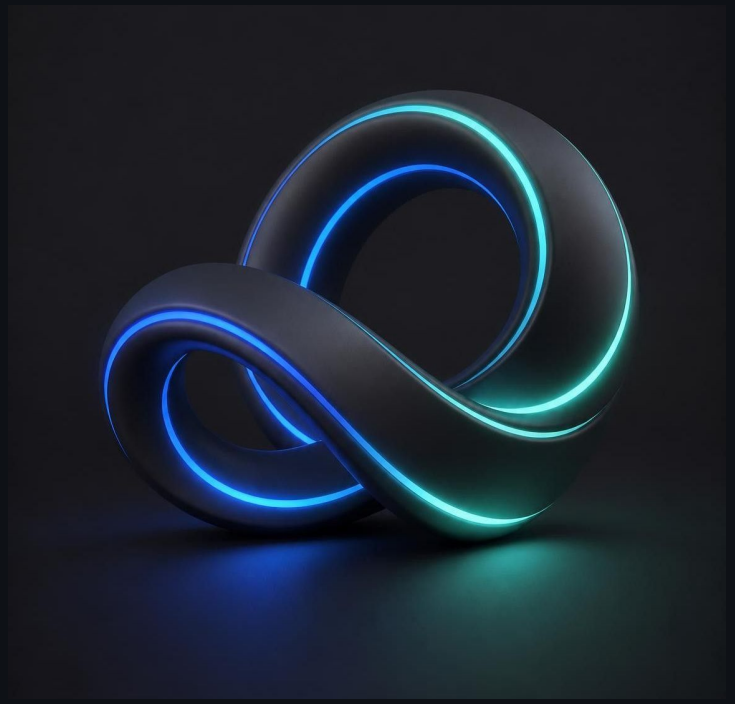

A cloud-native autonomous workflow

LoopNaria is a 100% autonomous B2B SaaS. A multi-agent AI pipeline replaces human video editors and localizers: one raw VOD in, multi-lingual, multi-format assets out.

0% agency, 100% product: scalable self-serve workspace

Context-aware: cultural adaptation, not just translation

One-Source Multi-Use: 1 VOD becomes Shorts, long-form, and SEO articles

Made with GAMMA

SYSTEM ARCHITECTURE

Multi-agent orchestration engine

Built on secure, scalable LLM orchestration and programmatic video engineering.

Raw data input
VOD or product URL uploaded to LoopNaria Cloud.

Agent 1: Context & Extraction
Claude / Gemini; STT and semantic analysis; emotion and hook-point detection.

Agent 2: Cross-Border Localization
Cultural adaptation in EN, KO, ID; JSON manifest of text, timestamps, audio.

Programmatic Media Engine
Dynamic panning and cropping 9:16 / 16:9; AI voice cloning TTS and dual audio ducking.

Multi-modal output: looping shorts, long-form storytelling, SEO web articles.

Made with GAMMA

CORE CAPABILITIES

A single engine for infinite growth loops

HOOK EXTRACTION

Semantic highlighting

Claude-powered agents read viewer sentiment signals to extract the highest-converting 3-second opening hooks.

LOCALIZATION

Cross-border AI suite

Localized copywriting and high-fidelity TTS tuned specifically for nuanced cultural demographics and slang.

AUTOMATION

Programmatic rendering

Code-based rendering pipeline with 2-tier typography, Ken Burns motion, and seamless loops without NLE overhead.

Made with GAMMA

BUSINESS MODEL

Tiered SaaS subscriptions

Predictable recurring revenue that scales without adding headcount.

FOR EARLY-STAGE STARTUPS & CREATORS

Growth SaaS Plan (Studio Edition)

Weekly automated Shorts and SEO blogs from raw creator data and video transcripts. Self-serve workspace with cloud asset library.

FOR GLOBAL-BOUND K-BRANDS

Enterprise Plan (Global Scale)

Advanced multi-region localization pipelines, custom high-fidelity AI voice cloning profiles, and API-level ERP and CMS integrations with SLA support.

Made with GAMMA

THE VISION

Shaping the standard for autonomous media

Human creativity plus autonomous AI agents, removing all friction from global content distribution. Ready to scale our cloud infrastructure for the next generation of global businesses.
